WHIP Your Molds Into Shape!

Four-Pin Sand Flask

The two-part cast iron mold frame for sand casting can be used to easily duplicate shaped parts of any kind into metal components. One of the best ways to make custom shaped jewelry!

- Sturdy cast iron mold for use with sand casting clay.
- 4 pins for easy alignment and stability.
- Overall dimensions: 6" x 4-1/2" x 2-1/4"
- Interior dimensions: 4-1/2" x 3" x 2-1/4"

Chasing Hammer with Flat Face

The "German Style" chasing hammer has a 1-1/8" flat face, ideal for packing the clay. 6oz. head is high grade stainless steel which has been case-hardened for long life.

The WHIP + Small Crucibles

Another EURO TOOL exclusive invented by master jeweler, Jay Whaley, the WHIP makes a lot of sense when using small melting dishes. Made of stainless steel. This Small WHIP set comes with two dishes: 1-3/4" and 2-1/4". The spring action keeps good tension to assure the user that melting dishes will not slip. Total length is 9-3/4".
